- Gained practical experience in backend technologies, enhancing skills in API development and database management.

## ACADEMIC PROJECTS

### TWITTER SENTIMENT ANALYSIS (2023 )

This Python project focuses on sentiment analysis using Twitter data and userinput sentences. It utilizes the Twitter API for data collection, implements preprocessing to remove noise, and employs machine learning or NLP techniques for sentiment analysis. The versatility of the project lies in its capability to assess sentiments not only from Twitter data but also from user inputs, making it a valuable tool for extracting and understanding public opinions. This application is built using HTML, CSS, Python, and the Flask framework.

### PERSONAL PORTFOLIO (2023 )

Crafted a personal portfolio with HTML, CSS, and JavaScript, showcasing details on education, work experience, and projects. This dynamic web page provides a comprehensive overview of skills and achievements. Explore my educational background, professional journey, and impactful projects in a visually appealing format. Experience an interactive presentation of my skills and accomplishments through this personalized portfolio.
